## card game

Two to six players are recommended for this game. The first player to collect three cards for each category wins!

### Directions:

- Divide the cards into three piles, one for each category:  
What do you know?  
What do you say?  
What do you do?
- Place each pile of cards face down, so that no one can see the questions.
- On each player's turn, she/he selects a card from one of the three piles. The player reads the card aloud and then tries to answer the question. If the other players like the answer, the player can keep the card.
- The first player to collect three cards for each category wins!
